

Mini symposium “Neural Circuits in Pain”

22nd March, 2016

Venue: Seminar Room 272, INF 440, Frauen & Haut Klinik,
Heidelberg University, 69120 Heidelberg

- 09:00-09:50** **Project A02:** Defining the contribution of C-fibre low threshold mechanoreceptors to nociception, acute pain and pain chronicity
Speaker: Paul Heppenstall
- 09:50-10:40** **Project A05:** Characteristics and consequences of subcellular calcium signaling in spinal neurons and glia in chronic inflammatory and neuropathic pain
Speaker: Anna Hagenston-Hertle
- 10:40-11:20** **Coffee break**
- 11:20-12:10** **Project B02:** Central oxytocin effects on acute and chronic pain processing
Speaker: Valery Grinevich
- 12:10-13:00** **Project S01:** Standardization and new development of pain-related models and methods in rodents and humans
Speaker: Anke Tappe-Theodor
